

► With and without thermometer

- 1 | Saccharometers are a special type of hydrometers used for measuring the sugar (sucrose) content of a solution.
- 2 | For this purpose, the saccharometer stem is graduated according to the Brix scale in which 1 degree Brix (°Bx) corresponds to a solution with 1 g of sucrose per 100 g of solution (1 % in mass).
- 3 | Nahita saccharometers cover a wide measuring range to adapt to any kind of necessity.
- 4 | Furthermore, they are available with or without thermometer (0-50 °C) to know at any moment the temperature of the solution to be analyzed.

Code	Range (°Bx)	Divisions	Length	Diameter	Thermometer
KLJ001	0-30	1	280 mm	15 mm	No
KLJ008	70-80	1	370 mm	26 mm	No
KLJ009	80-90	1	370 mm	26 mm	No
KLJ010	30-60	1	370 mm	21 mm	No
KLJ011	60-90	1	370 mm	21 mm	No
KLJ012	0-10	1/10	305 mm	26 mm	No
KLJ013	10-20	1/10	305 mm	26 mm	No
KLJ014	20-30	1/10	305 mm	26 mm	No
KLJ015	30-40	1/10	305 mm	26 mm	No
KLJ016	40-50	1/10	305 mm	26 mm	No
KLJ017	50-60	1/10	305 mm	26 mm	No
KLJ018	60-70	1/10	305 mm	26 mm	No
KLJ019	70-80	1/10	305 mm	26 mm	No
KLJ020	80-90	1/10	305 mm	26 mm	No
KLJ002	0-10	1/10	375 mm	25 mm	Yes
KLJ004	20-30	1/10	375 mm	25 mm	Yes
KLJ005	30-40	1/10	375 mm	25 mm	Yes
KLJ006	40-50	1/10	375 mm	25 mm	Yes
KLJ007	50-60	1/10	375 mm	25 mm	Yes
KLJ021	0-30	1/5	280 mm	18 mm	No
KLJ022	30-60	1/5	280 mm	18 mm	No
KLJ023	60-90	1/5	280 mm	18 mm	No
KLJ003	0-20	1/5	375 mm	18 mm	Yes
