

▶ KJM - Environment

▶ Thermo-hygrometer

- 1 | The Nahita thermo-hygrometer allows see the indoor temperature and relative humidity and the outdoor temperature due to a probe with a 1.5 m wire.
- 2 | It has a great digital display where can view the indoor temperature in the upper side, the outdoor temperature in the middle and the relative humidity in the lower side, where also is reflected the clock.
- 3 | The suitability of the humidity is reflected by emoticons: :)HR>50% o :(HR<50%.
- 4 | This thermo-hygrometer is suitable to be installed in any place in where it would be necessary to have a control of temperature and humidity like factories, warehouses, hospitals, office, laboratories, hotels, sport facilities, etc.
- 5 | It records the minimum and maximum values of indoor, outdoor temperature and relative humidity that can be reset to be noted them in different dates and times.
- 6 | It can be hung in the wall or put on the table.

Code	KJM017
Measuring range	Outdoor temperature: - 40/70°C ± 1°C - 40/158°F ± 2°F Indoor temperature: - 0/50°C ± 1°C - 32/122°F ± 2°F Relative humidity: : - 10-99 % HR ± 5%
Display resolution	0,1°C / 0,1°F / 1% HR
Clock funtion	12 h
Memory	Maximum and minimum temperatures and humidity
Exterior probe	With a 1.5 meter-long cable
Battery	One AAA 1.5 V
