

▶ BGP - Histology file cabinets

Modular filing systems for paraffin blocks and slides specially indicated for Histology and Pathological Anatomy laboratories. Of metal or plastic construction and large storage capacity, the modules are stackable in such a way

that they allow the configuration of the system according to the capacity required in each laboratory.

▶ Metallic slides file cabinets

- 1| For storage and classification of slides and histological preparations.
- 2| Each module consists of 6 drawers with safety stop.
- 3| Each drawer is subdivided in 6 fixed compartments for a better and more comfortable distribution of the slides.
- 4| Capacity of 5400 slides per filing module.
- 5| Base available for greater stability of the set of modules.

Reference	Description	Capacity	Dimensions
BPG013	Base	-	40x46x11 cm
BPG014	File cabinet	5400 slides	48x40,5x12,5 cm

▶ Plastic slides file cabinets

- 1| For storage and classification of slides and histological preparations.
- 2| Includes 6 supports for 75 slides.
- 3| Capacity of 450 slides.

Reference	Description	Capacity	Dimensions
BPG017	File cabinet	450 slides	34x23x10 cm
BPG018	Support	75 slides	-

▶ Metal block filing cabinets

- 1| For storage and classification of sample blocks included in paraffin.
- 2| Each filing module consists of 6 drawers with safety stop.
- 3| Each drawer has 12 removable metal guides for better compartmentation and distribution of paraffin blocks.
- 4| Capacity of 4800 blocks per filing module.
- 5| Base available for greater stability of the set of modules.

Reference	Description	Capacity	Dimensions
BPG015	Base	-	48x45x12 cm
BPG016	File cabinet	4800 blocks	48x45x39 cm
