

Wine pipette is a glass instrument used in wineries to obtain samples of wine directly from the barrel for a later tasting or analysis. It consists of a long glass tube with a pair of handles at one end to hold the pipette while it is introduced into the barrel.

At the opposite end of the pipette tip, the tube is closed except for a little hole over which the thumb is placed to avoid the pipette to empty when it is taken out the barrel.

▶ Straight glass wine pipette

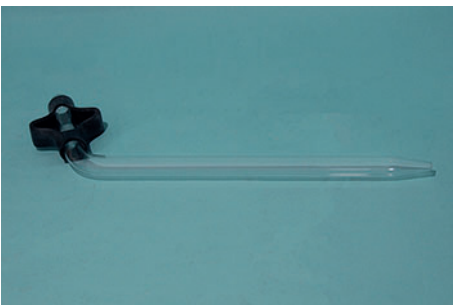

Code	Length	Capacity	Diameter
DLD001	640 mm	350 mL	30 mm

▶ Straight glass wine pipette with rubber handle

Code	Length
DLD006	35 cm
DLD007	50 cm
DLD008	65 cm

▶ Straight glass wine pipette with rubber handle, curved

Code	Length
DLD002	25 cm
DLD003	35 cm
DLD004	45 cm
DLD005	65 cm
