

Dog and cat skeleton sheet

Code QBN006, QBN007

Dog skeleton

Code QBN006

- This model represents the skeleton of a dog (*Canis domesticus*) mounted on a rectangular black plastic base.
- It features two vertical metal supports that are attached to the skeleton at the thoracic vertebrae and lumbar vertebrae respectively.
- The tail (caudal vertebrae) is removable, as is the head.
- The jaw is movable.

Code	Length (mm)	Width (mm)	Height (mm)
QBN006	530	200	330

Cat Skeleton

Code QBN007

- This model represents the skeleton of a cat (*Felis catus*) mounted on a rectangular black plastic base.
- It features two vertical metal supports that are attached to the skeleton at the thoracic vertebrae and lumbar vertebrae respectively.
- The tail (caudal vertebrae) is removable, as is the head.
- The jaw is movable.

Code	Length (mm)	Width (mm)	Height (mm)
QBN007	470	200	270
