

Simple solar system

Code QBQ001

- Simple model to visualise the movement of the planets within the solar system thanks to its rotating mechanism.
- It consists of the Sun and 9 planets (Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto), plus the Earth has the terrestrial moon incorporated. With the possibility of illumination from the Sun.
- Although Jupiter and Saturn are larger than the other planets, this model is not to scale.
- Mounted on a round plastic base.
