

THERMOMETERS

Code KJB003_004,009_014, 017_023, 026_036

Solid stem

- For use in laboratories as a method of controlling the temperature of chemical reactions, baths, ovens, etc., and, given its shape, as a stirring rod for solutions.
- Made in one piece, they have a brown outer graduation resistant to the action of physical and chemical agents.
- Available with resolutions of 0.1°C, 0.2°C, 0.5°C, 1°C and 2°C according to the needs of use.
- Filled with coloured organic liquid that is not polluting or hazardous.
- Available with white background (Ref KJB009) or yellow on the back of the thermometer.
- With glass ring at one end to allow the thermometer to be hung for convenience in certain situations.
- Each thermometer is supplied in a protective plastic case.

Without batch certificate

Enclosed scale, coloured spirit filled

- To be used in laboratories as a method for checking temperature of chemical reactions, baths, incubators, etc., and, due to their shape, as stirring rods
- The enclosed scale presents black graduation and labelling
- Available with resolution of 0.5°C, 1°C and 2°C depending on user's need
- With coloured spirit filled column
- With glass ring at one end to hang the thermometer for a higher comfort in certain situations
- Each thermometer is supplied in a protective plastic case
