

## Compasses

**Code FZG001, FZG002, FZG003, FZG004**

The compass is an essential instrument in science. Some of its many applications are that it allows the precise orientation and alignment of equipment and samples and facilitates the visualisation of magnetic fields in electromagnetism studies. Nahita offers different types of compasses guaranteeing accuracy, durability and ease of use.

### Aluminium compass

Code	Ø (mm)	Description
FZG001	40	With suspension hole, white background

### Plastic compasses

Code	Ø (mm)	Description
FZG002	44	With key ring, black background
FZG003	53	Directional, with sight glass and cover, white background
FZG004	55	With suspension hole, white background
